SUMMARY

Full Stack Developer graduated from UTN. I have experience building web applications from scratch, integrating SQL databases and APIs with Java (Spring Boot), and working on the frontend with Angular, React, and Next.js. I enjoy both worlds: building a solid and reliable backend, and a frontend that is fast and intuitive for the user.

EDUCATION

National Technological University (UTN MDP)	Mar del Plata, Buenos Aires, Argentina
<i>University Technician in Programming (TUP)</i>	March 2026
Amancio Williams Technical School N5 (EEST N 5)	Mar del Plata, Buenos Aires, Argentina
<i>Professional Personal Computer Technician</i>	March 2021

EXPERIENCE

Full Stack Developer - Freelance	April 2026 - Present
NutriControl - Scheduling and billing system for virtual medicine	Java Spring Boot, Next.JS, PostgreSQL
- Designed and developed the platform architecture, separating business logic into a RESTful API with Java (Spring Boot) and an optimized frontend (SSR/SSG) with Next.js that consumes said API. - Implemented the booking engine and payment gateway by integrating the PayPal API (managing webhooks and capturing funds), along with scheduled tasks to manage the status of appointments and payments 24 hours before the appointment. - Integrated the Google Meet API for dynamic generation of video consultation links, and developed an automated PDF generation service for delivering medical prescriptions and certificates. - Developed a real-time notification system using WebSockets, securing all communication and endpoints using JWT authentication and role-based access control (Administrator and Patient).	

HIGHLIGHTED PROJECTS

Thesis - National Technological University (UTN MDP)	December 2025 - March 2026
Stock Store - Transactional Inventory System with Online Store	Java Spring Boot, Angular, PostgreSQL
- Developed a full-stack web application for complete inventory management including an online store. - Led the migration of the database from MySQL to PostgreSQL, optimizing system scalability and enabling efficient handling of unstructured data using JSONB. - Designed a secure authentication and authorization system, integrating JWT tokens in the backend and Angular Guards in the frontend for route control.	
Personal Project	November 2025 - January 2026
SoftManager - Assistant for catalog product sellers	Java Spring Boot, Angular, MySQL
- Created an application for catalog product sellers that allows managing both inventory and sales made to customers. - Implemented a MySQL database, specifically adapted to the requirements and business logic of the project, guaranteeing optimal performance.	

SKILLS AND INTERESTS

- Backend:** Java, Spring Boot.
- Frontend:** TypeScript, Next.JS, Angular, React.
- Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Firebase.
- Architecture and Infrastructure:** Docker, JWT, DER Design, UML Modeling.
- Methodologies and Tools:** Scrum, Jira, Prompt Engineering.
- Languages:** Spanish (Native), English (B2).
